**Subject:** RE: New language for Bad River WWTP permit

So the last quarter needs to include the additional testing?

Hi Pat,

The permit became effective on 12/4/13. The additional testing should have begun on that date.

John

John,

Does the additional testing start on January 1<sup>st</sup> 2014 or is it to be done for the last quarter 2013? Permit date 11-4-13

Patrick Hunt

**Subject:** New language for Bad River WWTP permit

Hi Pat,

To address comments received on the WWTP permit, we intend to add the following condition to the permit. It is our hope to issue the permits in the coming weeks.

By January 31, 2015, the permittee shall prepare and submit to the EPA for approval an operational evaluation report. The report shall include an evaluation of collected effluent data, possible source reduction measures, operational improvements or other minor facility modifications that will optimize reductions in phosphorus discharges from the water reclamation facility.

Please let me know what you think.

Naomi, we do not believe this added condition affects the Band's 401 certification. Let me know if you have any questions.

John
